

Single-Phase, Integrated Heatsink Type SSR [Top-Bottom Terminal]

SRH1 Series

[Top-Bottom Terminal]

Single-Phase, Integrated Heatsink Type SSR [Top-Bottom Terminal]

■ Features

- High heat dissipation efficiency with ceramic PCB and integrated heatsink
- Input Indicator (green LED)
- DIN rail mount or panel mount installation
- [Voltage input type]
Zero cross turn-on, random turn-on models available
- [Current input type]
Phase control and cycle control possible
 - Phase control (power equality division/phase equality division)
 - Cycle control (fixed cycle/variable cycle)

⚠ Please read "Safety considerations" in operation manual before using.

○ Spacing

※When installing multiple SSRs, please keep space between SSRs for heat radiation. When installing SSRs horizontally (input part and output part on the same height), please supply less than 50% of the rated load current.

⚠ High temperature caution

While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in a burn due to the high temperature.

■ Proper Usage

⚠ Cautions during use

- Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
- 4-30VDC, 24VAC signal input should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Install the unit in the well ventilated place.
- Ground to the heat sink, panel, or DIN rail. Failure to follow this instruction may result in electric shock.
- Ground to the panel. Failure to follow this instruction may result in electric shock.
- While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in a burn due to the high temperature.
- In order to protect the product from the short-circuit current of the load, use rapid fuse of which I^2t is under the 1/2 of SSR I^2t . When short-circuited, replace the fuse to those of same specification with the used rapid fuse.
- Install dummy resistance in parallel with the load, to keep the sum of current flowing in the load and dummy resistance being over SSR minimum load current.
- When using random turn-on model for phase control, install noise filter between the load and the power of the load.
- Do not use near the equipment which generates strong magnetic force or high frequency noise.
- This unit may be used in the following environments.
 - Indoors (in the environment condition rated in 'Specifications')
 - Altitude max. 2,000m
 - Pollution degree 2
 - Installation category III

■ Operation Setting

● Detach front cover

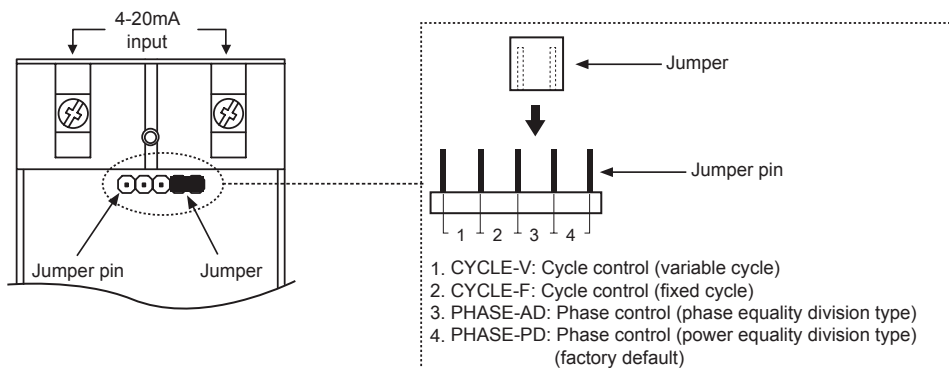

Press front cover connection 4 parts at right and left side with (-) driver, and front cover is detached.

※Before detaching front cover, you must cut off load current and input.

● Jumper pin setting

Operation mode is decided by jumper position.
 After changing operation mode, re-supply input signal.

Single-Phase, Integrated Heatsink Type SSR [Current Input Type]

■ Operation Mode

○ Phase control

● Output waveform of phase control

- When control input signal is 25%
- When control input signal is 50%
- When control input signal is 75%

※1: The black parts of output waveform are output on the load.

● Power equality division type

Controls output power which is proportional to control input (4-20mA) level.

● Phase equality division type

Controls phase angle which is proportional to control input (4-20mA) level.

○ Cycle control

● Fixed cycle

Controls continuously the number of full cycle which is supplied to load every 1 sec by being proportional to control input (4-20mA).

- When control input signal is 0%
- When control input signal is 50%
- When control input signal is 100%

● Variable cycle

Controls fast and accurately the subject with optimized the number of AC voltage cycle which is supplied to load by being proportional to control input (4-20mA).

- When control input signal is 10%
- When control input signal is 50%
- When control input signal is 90%

■ Proper Usage

⚠ Cautions during use

1. Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
2. Install the unit in the well ventilated place.
3. Ground to the heat sink, panel, or DIN rail. Failure to follow this instruction may result in electric shock.
4. While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in a burn due to the high temperature.
5. In order to protect the product from the short-circuit current of the load, use rapid fuse of which I^2t is under the 1/2 of SSR I^2t . When short-circuited, replace the fuse to those of same specification with the used rapid fuse.
6. Install dummy resistance in parallel with the load, to keep the sum of current flowing in the load and dummy resistance being over SSR minimum load current.
7. Do not use near the equipment which generates strong magnetic force or high frequency noise.
8. This unit may be used in the following environments.
 - ① Indoors (in the environment condition rated in 'Specifications')
 - ② Altitude max. 2,000m
 - ③ Pollution degree 2
 - ④ Installation category III
